DESCRIPTION: I-40 From West of Burke Mill Road (SR 2901) to Peters Creek
Parkway, Winston-Salem, NC

SUBJECT: Contaminated Soil - Parcel 212
(Old Salisbury Road Location)

State of North Carolina
Dept. of Natural Resources & Community Development
Division of Environmental Management
Groundwater Section
Winston-Salem Regional Office

Attention: Mr. John M. Stewart
Hydrogeologist I

Dear Mr. Stewart:

I wish to draw your attention to your letter of 5-5-88 which was directed to Mr. R. Stanley Morgan, our Division Right of Way Agent. Copy attached.

As you know, we elected to aerate this soil on site to the present time.

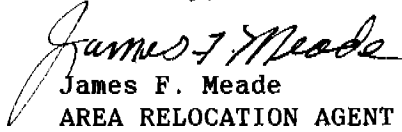

On 3-27-89 the Department of Transportation's Geotechnical Unit examined this petroleum contaminated soil that had been aerated. Tests with an Organic Vapor Analyzer (OVA) gave a maximum reading of 2.5 PPM, while a zero reading was obtained at most locations.

Due to these low measurements, it is, in our opinion, acceptable to incorporate this material into an embankment on the project without restrictions.

Mr. Stewart
